  row
                                        column-reverse
  row-reverse
```

Propriedade Flex-container

```
flex-wrap: (nowrap, wrap, wrap-
 reverse)
              nowrap
                                     wrap
                           wrap-reverse
```

Propriedade Flex-container

- justify-content(alinhamento ao longo do eixo horizontal do container): flex-start, flex-end, center, spacebetween, space-around

Propriedade Flex-container

flex-start

flex-end

Center

space-between

space-around

Propriedade Flex-container

- align-items (alinhamento ao longo do eixo vertical do container, utilizado quando tiver uma única linha):
- stretch , flex-start, flex-end, center, baseline

foo bar foo bar foo bar foo bar foo bar					
	foo bar				

line

Propriedade Flex-container

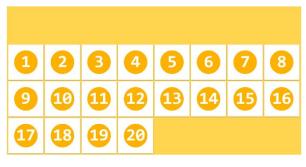

- align-content(distribui as linhas ao longo do eixo vertical do container): stretch,flex-start, flex-end, center, space-between, space-around

### Propriedade Flex-container

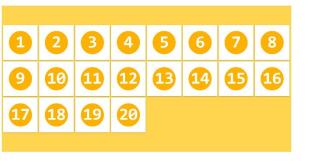

stretch

flex-start

flex-end

center

space-between

space-around

Propriedade Flex-Items

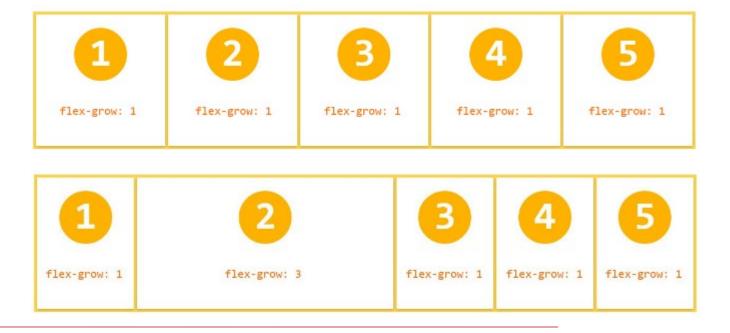

order (determina ordem que o item será exibido)

Propriedade Flex-Items

flex-grow (determina o fator de ampliação do item)

Propriedade Flex-Items

flex-shrink (determina o fator de redução do item)

Propriedade Flex-Items

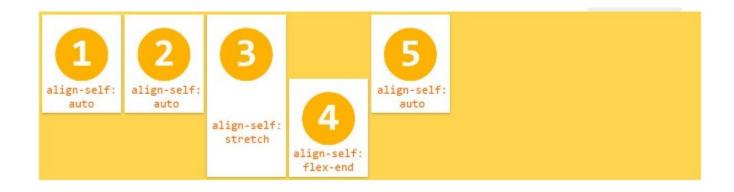

- flex-basis (determina o tamanho inicial do item)

Propriedade Flex-Items

- align-self(alinhamento individual do item)

Exercícios

```
- FlexBox Defender
```

```
- FlexBox Froggy
(https://flexboxfroggy.com)
```
